The Appendix includes the following item(s):

- ☒ - a new or amended Abstract of the Disclosure

REPLACEMENT SHEET

ABSTRACT

Molten ceramic grains are intended, for example, for applications involving abrading tools, having the following average chemical weight composition, expressed in weight percent based on oxide content:  $\text{Al}_2\text{O}_3$ : 93 % to 97.5 %;  $\text{MgO}$ : 2.2 to 6.5 %;  $\text{SiO}_2$ : < 0.1 %; other impurities: < 0.4 %.
